

WINDOWS MOVIE MAKER

Jorge F. Figueroa, PhD

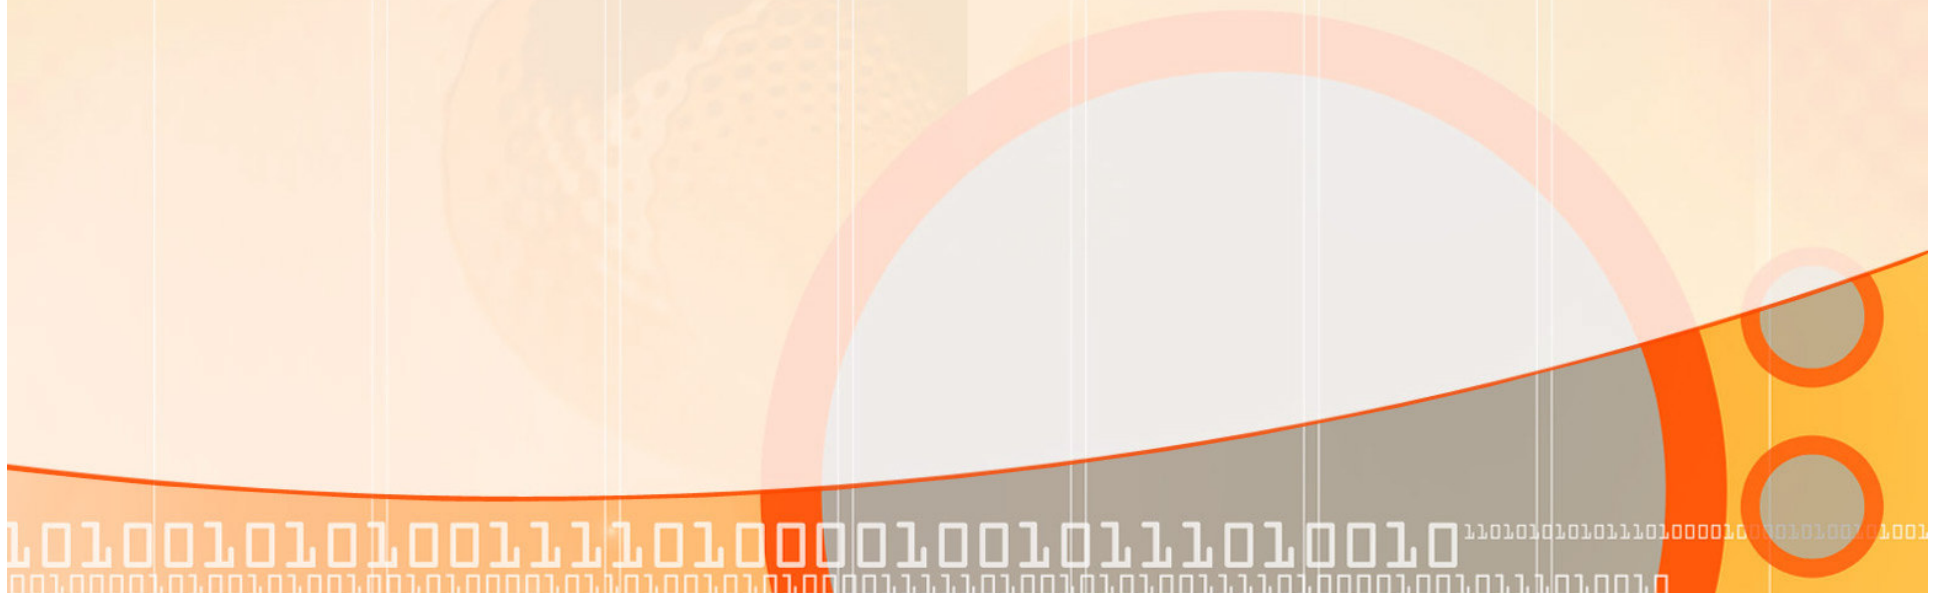

What is WMM?

- *WMM is an application used to create, edit, and share your projects with videos, images, and sounds.*
- *Is an amazing tool you will get immediate results in an easy and fast way.*

Learning with WMM

- *Video production is a study plan that can enhance language, writing, auditory, literacy, and visual skills.*
- *It promotes teamwork.*
- *It help learners develop other skills like decision making, cooperative work, and oral discussion.*

WMM Utilities

Faculty	Students
Digital stories Interactive learning Study guides Video on current issues Course lectures Videos for classroom rules and regulations Storytelling Convert PPT to video Demonstrations	Digital stories Documentaries Study guides for Ipods Research projects Digital Text Interviews Storytelling Convert PPT to video Scientific Projects

Before you begin

- *Be clear what are you going to do?*
- *Create in your HDD a folder with all the documents.*
- *Create a storyboard with all the essential elements to create a video.*

To Insert Archives or Files

1. **Audio:** .aif, .aifc, .aiff, .asf, .au, .mp2, .mp3, .mpa, .snd, .wav y .wma
2. **Image:** .bmp, .dib, .emf, .gif, .jfif, .jpe, .jpeg, .jpg, .png, .tif, .tiff y .wmf
3. **Video:** .asf, .avi, .m1v, .mp2, .mp2v, .mpe, .mpeg, .mpg, .mpv2, .wm y .wmv
4. *Most common: mp3, .wav, y .wma*
5. *No long length*
6. *No more of four archives if it's of short length.*
7. *Music segments need to be organize.*
8. *Copyright material wouldn't be permitted in your presentation.*

Effects Collection

Transitions	Animations	Titles and Credits
Controls the form in which a clip or image moves to the next clip or image.	There are different animation effects which add to your video special effects	Short sentences and phrases

Recording

- *All effects and clips need to be set.*
- *Synchronize clips and titles.*
- *Synchronization for the listener delight.*
- *Save in HDD and then burn to DVD or CR-Rom.*

Open Source

The new direction in software

Objective

- *Learn new and free computer software applications equivalent to commercial applications.*

Concept

- *Is refer as the user's freedom to:*
 - *Execute*
 - *Copy*
 - *Distribute*
 - *Study*
 - *Change*
 - *Improve the application*

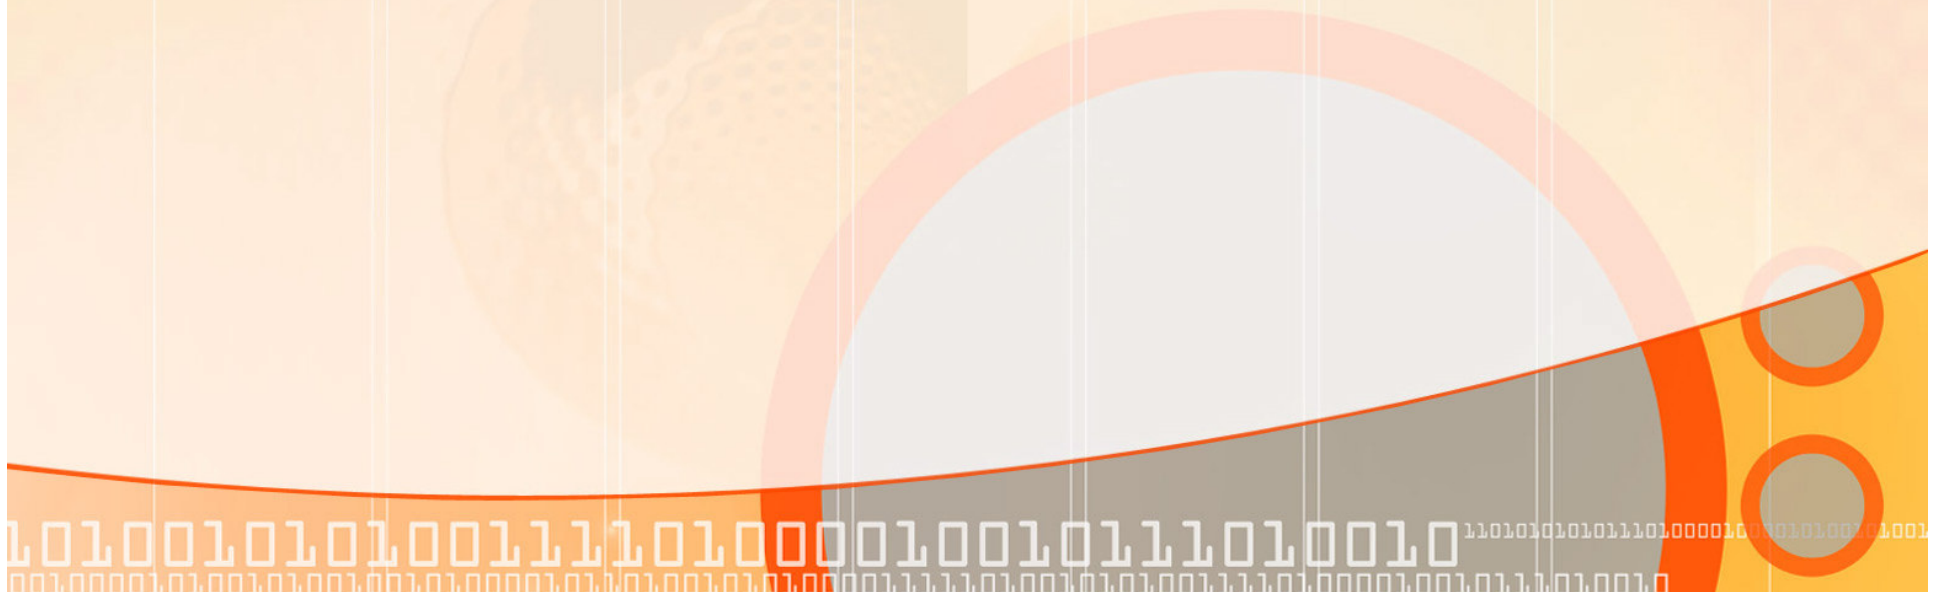

Definition

- *Term use for software built and develop in a specific form.*
- *It started in 1998 by some users of the “free software community”.*
- *Term use for free software development and distribution.*

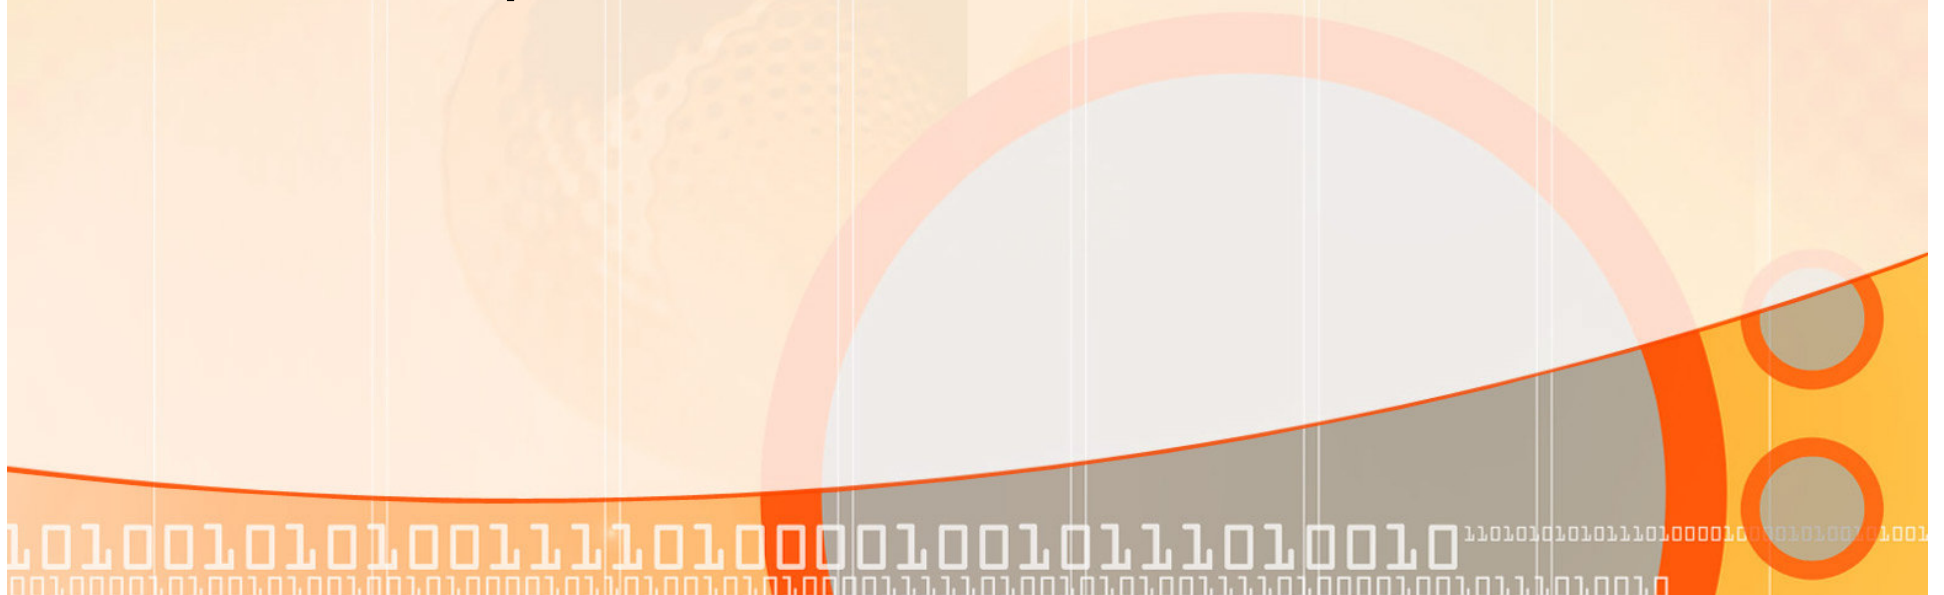

Chronology

- *1998: Linus Torvalds designs the Linux platform.*
- *Jan 22 1998: Some users start working with Linux in the “free software” community.*
- *Feb 3 1998: opensource.org starts*
- *June 4 1999: Microsoft confirms that Linux sells more than Windows.*

Open Source freedom

- *Freedom of programs execution.*
- *Freedom to study the software and adapted to any necessity.*
- *Freedom of distribution.*
- *Freedom to improve the program and go public with the improvements.*

Advantages

- *Flexibility*
 - *It helps in the improvement and development of software upgrades.*
- *Security*
 - *Less errors and more confidence that commercial versions.*
- *Development*
 - *Less time to develop thanks in part for the availability of the internet tools.*
- *User relation*
 - *The software becomes part of the developer*

Advantages

- *Free*
 - *Freedom of distribution*
 - *Combat the pirate software*
- *Economic*
 - *They are free*

Open Source Software

- *OpenOffice*
- *Scribus*
- *Cmap*
- *TuxPaint*
- *Audacity*
- *NetLogo*
- *Firefox*
- *Moodle*
- *Celestia*
- *GIMP*
- *NVU*
- *Edubuntu*
- *Freemind*
- *Phpcounter*

Open Source Software

- *PDF*
- *Spreadsheet*
- *HTML Editor*
- *Linux*
- *Dasher*
- *Gnopenicus*
- *PoerTalk pVoice*
- *Virtual Magnifying Glass*
- *CallProfiler*

Web 2.0

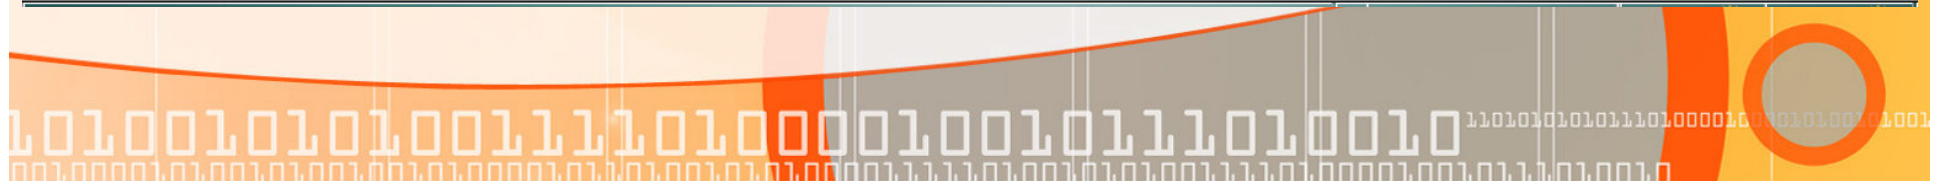

The New Internet

What will happen if you open a website and.....

You find all you where looking for...

You choose

The image shows a screenshot of the GoWeb20.net website, which is a comprehensive directory of web 2.0 services. A grey speech bubble with the word "Blogging" is overlaid on the page, pointing to the "Blogging" link in the directory list. The website's interface includes a Mozilla Firefox browser window at the top, a search bar, and a navigation menu. The main content area is a large green box containing a grid of service categories, with "Blogging" highlighted. To the right of the main grid is a sidebar with advertisements for TechCrunch, Mister Wong, and Jumpaye, as well as a section for "Some panel widgets" listing Yedda, TechCrunch, and Digg. The footer of the website contains links for "About", "Advertise", "Suggest", and "Service Owners", along with the names "Ori Yakuel" and "Eyal Shahr".

Tools

Suddenly you got a list...

Where am I?

- *You are in the NEW INTERNET!!!!!!*
- *This is the evolution of traditional technologies into web applications focus in end user.*
- *WEB 2.0 is an attitude not a technology.*
- *They are applications that move away from the traditional desktop and promote services and collaboration.*

Transition from 1.0 to 2.0

WEB 1.0	WEB 2.0
DoubleClick	Google AdSense
Ofoto	Flickr
Akamai	Bit Torrent
Mp3	Napster
Britannica Online	Wikipedia
Personal websites	Blogging
Domain name	Search engine optimization
Content management systems	Wikis
Directories	Tagging
Stickiness	Syndication

Folksonomy

- *Folksonomy = folk + taxonomy*
- *Open, democratic form of organization*
- *Tags bridge structure and meaning*
- *Tags reflect the social fabric*
- *“It’s like 90% of a ‘proper’ taxonomy but 10 times simpler” (Butterfield, 2004)*

What is ATOM and RSS?

RSS and Atom feeds are the structures that organize content which is being updated on a regular basis in order for others to retrieve it.

This content could be articles, blog posts, photos, PDF documents, PowerPoint Presentations, audio files, video files, or other applications.

If the content is the flesh of an orange then a feed would be its skin. The skin keeps the flesh in place so that it is easier to transport.

Benefits to connecting people via 2.0

- *collective intelligence - collaborative*
- *transparent - instant gratification*
- *non-hierarchical - democratic*
- *potential for passion - ownership*
- *open to public - real recognition*
- *permanence - searchable resource*

Getting Started

- *1.Start by blogging - risks < rewards*
- *2.Connect students - via blogs, facebook*
- *3.Collaborate - via del.icio.us, wiki*
- *4.Blog assignments - let ego motivate*
- *5.Be lazy - let students take the lead*
